

The UCSD Retirement Association invites you to attend:

Gardening Series

with the Master Gardener's Association

Join us for presentations by speakers of the Master Gardener's regarding gardening. In these presentations, they will discuss how to succeed in planting vegetables in the fall, how to accommodate your garden for your pet and wildlife, the many precautions you will need to conserve water and landscape properly during times of drought, and how to bring joy to your garden as a whole.

Please RSVP at <http://hrweb.ucsd.edu/ra/> - You must RSVP in order to receive the Zoom link

Another exciting opportunity offered through this series is our Docent-led tours of San Diego Botanic Garden. In groups of 10, we will explore why each year, San Diego Botanic Garden is visited by thousands of people from around the world who enjoy the scenic trails and inspiring vistas of this nationally recognized botanic garden. Four miles of trails wind through its 29 uniquely themed gardens, among them a tropical rain forest, a bamboo garden, and regional desert landscapes.

Water Conservation, Rainwater, & Grey Water

Tuesday, September 21, 2021 ∞ 12:00 PM - 1:00 PM

Planting Vegetables in the Fall
